Q1. A block of mass 2 kg rests on a smooth incline of 30° as shown in the figure. Find its acceleration.

Fig. 1

Q2. The dimensional formula of Planck's constant is (A) ML^2T^{-1} (B) MLT^{-2} (C) ML^2T^{-2} (D) MLT^{-1}

Q3. In the circuit shown, find the current through the 4 Ω resistor.

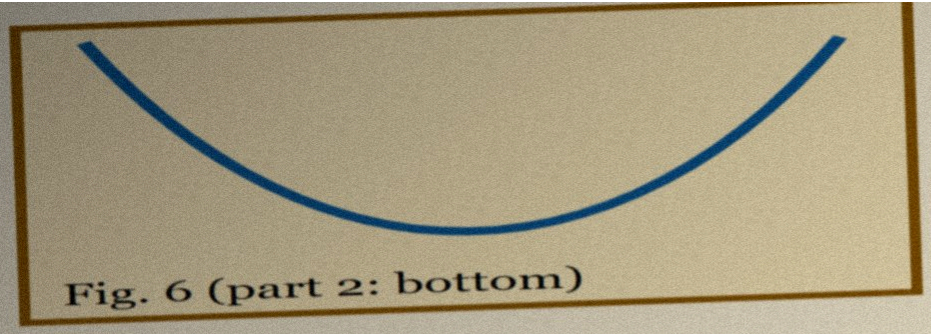

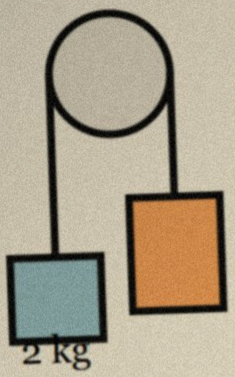

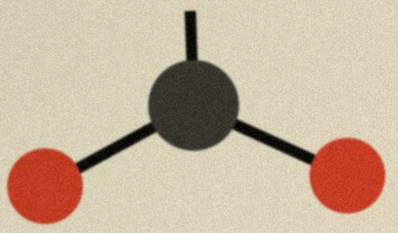

Fig. 6 (part 2: bottom)

Q7. Two arrangements are shown: (a) a pulley system and (b) a molecule.

Structure X

Q8. A ray passes through the prism shown. Find the angle of deviation.
